

RMS Express

Picture Editing and Resizing

Phil Sherrod – W4PHS
Winlink Development Team

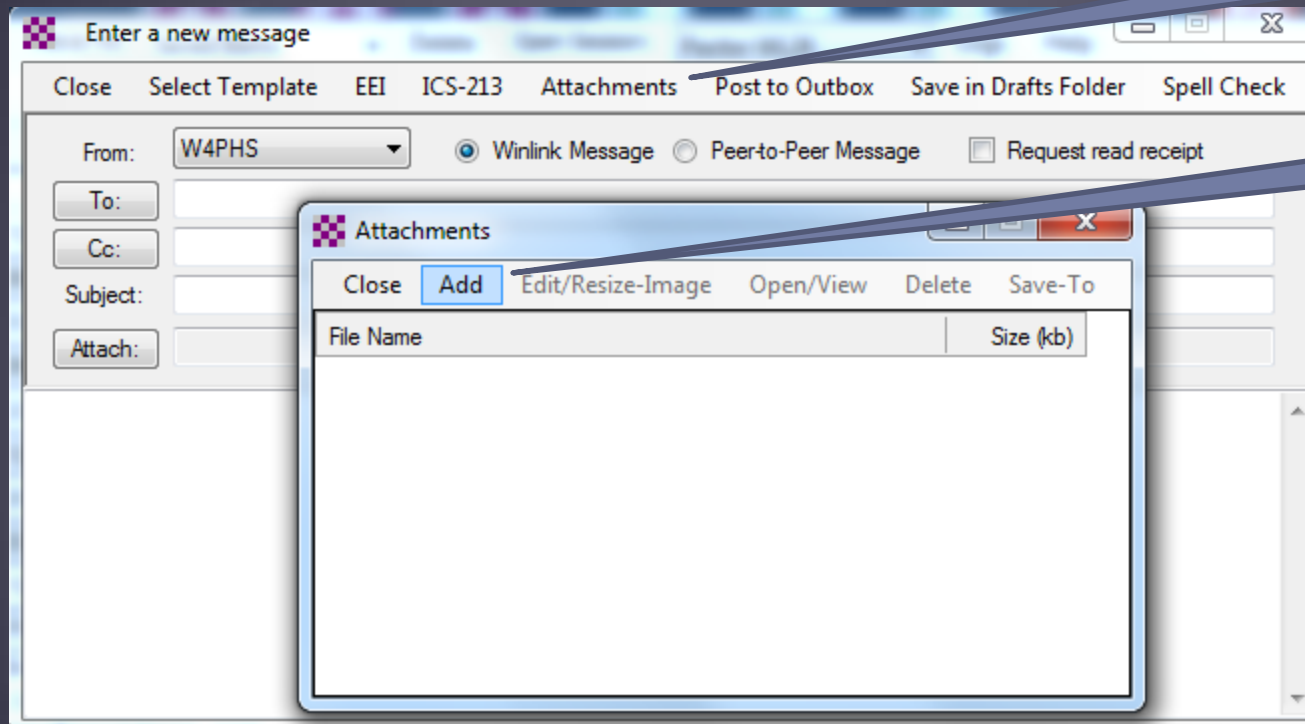

RMS Express Picture Editor

- RMS Express includes a built-in picture editor.
- The picture editor can do three things:
 - Crop a picture
 - Resize a picture (change the resolution)
 - Rotate a picture
- The picture editor can handle these types of pictures:
jpeg, gif, png, bmp, tiff

Attaching Pictures to Messages

- While composing a message, click “Attachments” then click “Add” on the attachments screen.
